- ✓ Advanced speech-grading system for pronunciation practice
- ✓ Ongoing progress reports

**24/7 TEEN TALK ENGLISH is an attractive, easy-to-use language course aimed at taking 9 to 13 year olds from the very basics of English to pre-intermediate level.**

The main character, Gilbert, takes the pupil into his circle of friends, his family and his imagination. As an adolescent in today's world of computers, mobile phones and the Internet, he helps his peers to acquire a basic understanding and command of the English language.

In a playful and non-conventional educational environment, children are motivated to play language games, practice their grammar, and learn new vocabulary and idioms. Advanced speech recognition makes listening and speaking practice effective and enjoyable.

**24/7 TEEN TALK ENGLISH covers two basic levels, up to early secondary school level, and provides over 80 hours of interactive learning material for each level.**

### Colourful and appealing lessons

There are three main types of lessons found in 24/7 Teen Talk English:

- **Core lessons:** introduce the key learning concepts in a colourful context and provide exercises that target specific English skills
- **Video lessons:** consolidate an entire Unit with a short series of interesting and immersive animations that encourage effective English practice
- **Revision lessons:** summarise the core lessons with extra exercises and applications of the English language
- **Tests:** assess the understanding of the user about the course with the use of a countdown-timer that limits the amount of time the user has to finish the exercise.

### Fun and interactive activities

The course covers the full range of language abilities: speaking, writing, reading and listening-comprehension through interactive activities;

- Hundreds of photos, animations and recordings ensure the enduring fascination of pupils throughout the entire course
- The audio-visual content is recorded at Britain's John Green TEFL tape studios, a world-renowned institution, using specialized children's voices.
- Numerous educational games and cartoons

### Fun speaking practice

In most language courses speech training evaluation is left to the student. In 24/7 TEEN TALK ENGLISH advanced speech recognition software ensures thorough pronunciation training, evaluation and comparison to native speaker competence.

### Measured learning progress

From any point in the course a report indicating the covered material is available:

- Each exercise is accompanied by a detailed activity report indicating the progress along with the option of showing the correct answers
- Revision and Test Units check the level of knowledge gained throughout the course

- New vocabulary building exercises in three stages: visual presentation, pronunciation practice and practical application.

- Extensive dictionary with a **Search** option and a **Grammar** tool, all accessible directly from any point in the course

Motivating 100% correct answers by providing the student with educational bonuses Student error reporting and correct answers given with constructive feedback
